

HW04 Bug Report - 20 Confirmed SUT Defects

Reporter: Nguyễn Tấn Thắng (23127259)

Environment: EShop local SUT; Chromium, Firefox, WebKit; 2026-08-24

Evidence: Playwright HTML reports under `playwright-report/` and visible report screenshots under `23127259/evidence/report-screenshots/`.

All cases below assert the documented SRS behavior and fail consistently on three engines. GitHub Issue links remain **Pending** until the student creates them and uploads the corresponding failure screenshot; this report does not claim external actions that have not occurred.

Reproduction Pattern

1. Start the three SUT services through Playwright `webServer`.
2. Run `npm run test:multibrowser:all`.
3. Open the named feature/browser report and select the mapped `@bug` case.
4. Review the assertion, screenshot, error context, and trace.

FR-02 - Login and Account Lockout

ID / Test	SRS	Expected	Actual	Severity	GitHub Issue
BUG-LGN-01 / TC05	FR-02	Malformed email is rejected by HTML5 validation	Email input is <code>type=text</code> ; <code>invalid-email</code> is valid to the browser	Major	Pending
BUG-LGN-02 / TC07	FR-02	One failed login increments counter by 1	Counter changes from 0 to 2	Critical	Pending
BUG-LGN-03 / TC08	FR-02	First three wrong submissions are processed before lock applies	Third request already returns 403 because account locked after two	Critical	Pending
BUG-LGN-04 / TC09	FR-02	Temporary lock lasts approximately 30 seconds	<code>locked_until</code> is approximately 180 seconds ahead	Major	Pending
BUG-LGN-05 / TC11	FR-21	Page has one H1 titled <code>Đăng Nhập</code>	No H1; H2 text is <code>Đăng Ký</code>	Major	Pending
BUG-LGN-06 / TC12	FR-02/22	Email input is <code>type=email</code> and label is <code>Email</code>	Input is <code>type=text</code> ; label is <code>Username</code>	Major	Pending
BUG-LGN-07 / TC13	FR-22	Password input masks characters using <code>type=password</code>	Password input is <code>type=text</code>	Critical	Pending
BUG-LGN-08 / TC14	FR-21	Submit label is Vietnamese <code>Đăng nhập</code>	Button label is English <code>Sign In</code>	Minor	Pending
BUG-LGN-09 / TC15	FR-22	Login error appears above submit button	Error block is rendered after the form	Major	Pending
BUG-LGN-10 / TC16	SEC-01	Login response does not expose stored password	Response <code>user.password</code> contains the plaintext password	Critical	Pending

Evidence directories: `playwright-report/fr02-login-{chromium,firefox,webkit}/`.

FR-07 - Shopping Cart

ID / Test	SRS	Expected	Actual	Severity	GitHub Issue
BUG-CART-01 / TC12	FR-07	Adding the same product increments quantity in one row	Two independent rows are created	Major	Pending
BUG-CART-02 / TC13	FR-07/24	Removal requires a confirmation dialog	Item is removed immediately; no dialog event fires	Major	Pending
BUG-CART-03 / TC14	FR-07	Total label is <code>Tổng cộng</code>	UI renders <code>Tổng tạm tính</code>	Minor	Pending
BUG-CART-04 / TC15	FR-07	Quantity cell contains plus and minus controls	Quantity is static text with zero buttons	Major	Pending
BUG-CART-05 / TC16	FR-07/24	Empty cart contains an icon or illustration	Empty state contains text and link only	Minor	Pending
BUG-CART-06 / TC17	FR-07	Non-empty cart link is <code>Tiếp tục mua sắm</code>	Link is <code>← Mua tiếp</code>	Minor	Pending

Evidence directories: `playwright-report/fr07-cart-{chromium,firefox,webkit}/`.

FR-16 - Product Import from CSV

ID / Test	SRS	Expected	Actual	Severity	GitHub Issue
BUG-CSV-01 / TC06	FR-12/SEC-03	Customer token receives 403 from admin import API	Customer token imports products with status 200	Critical	Pending
BUG-CSV-02 / TC09	FR-16	Any invalid row rolls back the whole batch	Valid row remains inserted when another row is invalid	Critical	Pending
BUG-CSV-03 / TC10	FR-15/16	Non-positive price returns validation error	Negative price imports successfully with status 200	Critical	Pending
BUG-CSV-04 / TC11	FR-16	Quoted comma remains inside one RFC 4180 field	Frontend uses <code>split(',')</code> ; first cell becomes <code>"Product</code>	Major	Pending
BUG-CSV-05 / TC12	FR-16	File input declares <code>accept=".csv"</code>	<code>accept</code> attribute is absent	Minor	Pending

Evidence directories: `playwright-report/fr16-import-csv-{chromium,firefox,webkit}/`.

Consistency Check

- Unique defects: 20.
- Failing `@bug` cases: 21, because TC05 and TC12 in FR-02 both evidence the same email-input root cause but verify different acceptance criteria.
- Browser-level bug failures: $63 = 21 \text{ cases} \times 3 \text{ browsers}$.
- Unexpected automation failures: 0.
